

Maths

Try these fun activities at home with your child:

Four in a line

Draw a 6 x 7 grid. Fill it with numbers under 100.

26	54	47	21	19	5	38
9	25	67	56	31	49	13
39	41	6	1	75	28	90
14	50	81	23	43	4	37
45	29	72	34	7	58	17
36	2	55	11	22	40	42

Take turns.

Roll three dice, or roll one dice three times. 7

Use all three numbers to make a number on the grid.

You can add, subtract, multiply or divide the numbers, e.g. if you roll 3, 4 and 5, you could make $3 \times 4 - 5 = 7$, $54 \div 3 = 18$, $(4 + 5) \times 3 = 27$, and so on.

Cover the number you make with a coin or counter.

The first to get four of their counters in a straight line wins.

Millions

Pretend you have £1 000 000 to spend or give away. Plan with your child what to do with it, down to the last penny.

Favourite food

Ask your child the cost of a favourite item of food.

Ask them to work out what 7 of them would cost, or 8, or 9. How much change would there be from £50?

Repeat with his / her least favourite food.

What is the difference in cost between the two?
